GIS ANALYST | GEOSPATIAL DATA MANAGEMENT | SPATIAL ANALYSIS | CARTOGRAPHY

GIS Analyst with more than two years of experience supporting federal and commercial projects through geospatial data management, spatial analysis, cartographic production, and GIS database maintenance. Experienced utilizing ESRI ArcGIS Pro, QGIS, and web-based mapping technologies to create, edit, validate, analyze, and visualize spatial datasets supporting transportation, environmental, infrastructure, planning, engineering and sustainability-related initiatives

Recognized for delivering accurate, high-quality GIS products while maintaining strict quality-control standards and meeting demanding project schedules. Skilled in spatial data editing, geodatabase management, feature extraction, cartographic design, web mapping, data visualization, and workflow improvement. Known for quickly learning new technologies, identifying process efficiencies, and collaborating effectively with multidisciplinary teams to develop practical geospatial solutions.

CORE GIS EXPERTISE

- | | | |
|---|---|---------------------------------|
| ● ArcGIS Pro | ● ArcMap Desktop | ● GIS Data Creation Editing |
| ● Spatial Analysis | ● Geospatial Data Management | ● Cartographic Design Mapping |
| ● Geodatabase Development Maintenance | ● Data Quality Assurance (QA/QC) | ● Spatial Querying Analysis |
| ● Feature Extraction & Validation | ● Remote Sensing Imagery Interpretation | ● Web Mapping Applications |
| ● Geocoding Address Matching | ● Data Visualization | ● SQL Relational Databases |
| ● Metadata Management | ● Environmental Transportation GIS | ● Technical Reporting |
| ● Workflow Optimization | ● Team Collaborator | ● Effective Communicator |

TECHNOLOGY PROFICIENCY

ESRI Applications

- | | | |
|-----------------------------------|------------------|---------------------|

PROFESSIONAL EXPERIENCE

Syntelligent Analytic Solutions, LLC, Falls Church, VA

Dec. 2024 - Apr. 2025

Project Specialist | GIS Analyst

Supported geospatial data development, editing, spatial analysis, cartographic production, and quality-control efforts for large-scale GIS projects utilizing QGIS. Maintained spatial datasets supporting transportation, environmental, infrastructure, hydrographic, and planning-related mapping initiatives while ensuring compliance with established project standards.

- Created, edited, and maintained geospatial datasets supporting mapping, planning, and analytical initiatives using QGIS.
- Consistently exceeded production goals by processing 40–70+ geospatial features daily while maintaining strict quality standards.
- Performed feature extraction, attribute validation, and spatial data editing to improve accuracy and usability of GIS databases.
- Conducted topology reviews and quality-control checks while maintaining error rates below established project thresholds.
- Interpreted aerial imagery and source materials to identify, verify, and update transportation, hydrographic, infrastructure, and features.
- Supported map development and cartographic production efforts for internal project deliverables and spatial analysis products.
- Maintained metadata and geospatial documentation to support data integrity, traceability, and project consistency.
- Collaborated with GIS analysts, project teams, and quality reviewers to resolve data discrepancies and improve workflow efficiency.
- Developed status reports and production summaries to communicate project progress, quality metrics, and deliverable status.

Dynamis, Falls Church, VA

Dec. 2023 - Nov. 2024

Junior Data Analyst (Remote)

Supported GIS, analytical, reporting, and database management activities through geospatial analysis, geocoding, data visualization, and spatial data validation.

- Utilized ArcGIS Pro to perform geocoding, spatial analysis, spatial querying, and location-based validation.
- Created maps, dashboards, and visual reports for technical and non-technical stakeholders using ArcGIS Pro, Tableau, and Excel.
- Integrated GIS datasets with SQL databases and reporting systems to improve accessibility and interpretation of spatial information.
- Managed large datasets through SQL queries, validation processes, and quality-control reviews.
- Produced cartographic products and analytical visualizations supporting project reporting requirements.
- Performed routine address geocoding and location validation activities to improve spatial accuracy and data reliability.
- Collaborated with multidisciplinary teams to support reporting requirements, project objectives, and data-driven decision-making.
- Maintained data accuracy through systematic review, verification, and quality-control procedures.

Geospatial Production Analyst (Remote)

Produced and validated geospatial data products utilizing ArcGIS Pro and established GIS workflows supporting mapping and spatial analysis initiatives.

- Created and edited geospatial datasets from high-resolution imagery using ArcGIS Pro.
- Performed topology validation and quality-control reviews for transportation, hydrographic, and cultural feature datasets.
- Supported map production and cartographic development efforts for project deliverables and geospatial products.
- Developed GIS datasets designed for integration into multiple mapping and analytical environments.
- Collaborated with GIS specialists and project managers to resolve technical issues and maintain production schedules.
- Ensured data consistency and accuracy through comprehensive validation and quality-control procedures.

ADDITIONAL PROFESSIONAL EXPERIENCE

Royce Geospatial Consultants, Arlington, VA	Associate Geospatial Analyst (Intern)	Sept. 2022 - Nov. 2022
ISpatial, Inc. (Aerotek), Vienna, VA	Junior Geographic Information Systems Consultant	June 2021 - Sept. 2021
ASRC Federal, Inc., Reston, VA	Geographic Information Systems Technician	June 2020 - Sept. 2020

GIS PROJECT | TECHNICAL APPLICATIONS

Satellite Imagery Feature Extraction & Spatial Analysis

Utilized ArcGIS Pro and high-resolution commercial and national satellite imagery to extract, digitize, attribute, and validate transportation networks, terrain, vegetation, structures, and other geospatial features. Reconciled discrepancies between vector and imagery datasets, performed feature alignment and validation activities, and conducted comprehensive QA/QC reviews to ensure data accuracy, consistency, and compliance with project standards.

Transportation Network & Address Database Maintenance

Maintained and updated transportation, address, and boundary datasets within the U.S. Census Bureau's MAF/TIGER Database (MTDB), identifying and digitizing required changes through GIS analysis and data validation workflows. Resolved roadway and hydrographic alignment conflicts, performed quality-control reviews, and supported the accuracy and completeness of geospatial information used in national census and mapping programs.

EDUCATION

- George Mason University, Fairfax, VA
Bachelor of Science: Geography - 2019
- Northern Virginia Community College, Sterling, VA
Associate of Science: Geospatial Specialization - 2017
